Education

- **Monash University** *2026–Present*
  Master of Artificial Intelligence *- Machine Learning, Deep Learning, Data Science* Melbourne, Australia
- **Vellore Institute Of Technology** *2020–2024*
  Bachelor of Technology *- Computer Science and Engineering* GRE: 322/340

Experience

- **Tata Consultancy Services (TCS) - Systems Engineer** *Sep 2024 – Feb 2026*
  Full-time Employment – HDFC Bank (BFSI Domain) Bangalore, India
  - Developed and maintained **Java Spring Boot** REST APIs for HDFC Bank's core banking modules, supporting high-volume financial transactions in the BFSI domain.
  - Built and executed automated test suites (unit, integration, regression) using **Selenium**, reducing manual QA effort and improving release confidence.
  - Performed root cause analysis on production defects across 3+ banking modules and contributed to **CI/CD pipelines** using Git for consistent deployments.
  - Delivered features, bug fixes in an agile CRM team of 10+ for critical banking systems under tight deadlines.

- **Artificial Intelligence Powered by Google Developers** *Jun 2023 – Jul 2023*
  Internship Remote
  - Developed an interactive GUI application to enhance mathematics learning using AI-based shape recognition.
  - Implemented models using TensorFlow and Keras to detect hand-drawn shapes and generate relevant formulas.
  - Built and deployed the application using Flask, NumPy, and Matplotlib.
  - Collaborated using Jupyter Notebook, IBM Watson Studio, and Anaconda to deliver project objectives.

Projects

- **SMART MATHEMATICS TUTOR**
  - AI-based shape recognition system
  - Built a CNN model (TensorFlow, Keras) to classify hand-drawn shapes with high accuracy.
  - Achieved ∼99% precision in shape recognition, ensuring reliable predictions.
  - Developed a Flask-based app to detect shapes and display formulas, area, and perimeter in real-time.
  - Applied image preprocessing and data augmentation to improve model performance.
  - Tools: Python, TensorFlow, Keras, OpenCV, Flask, NumPy, Matplotlib.

- **BLOCKCHAIN-BASED SECURE DATA STORAGE WITH SHA-512 ENCRYPTION**
  - Secure File Transaction System with Blockchain and SHA-512
  - Implemented AES encryption and SHA-512 hashing for robust protection; conducted comparative analysis of MD5, SHA-1, SHA-256, and SHA-512.
  - Designed smart contracts for secondary verification access control across a 4-stage pipeline: Data Owner, Data User, Private Blockchain, Public Blockchain.
  - Tools: Blockchain (Private & Public), AES, SHA-512, MySQL, HTML, CSS.

Technical Skills

Languages: Python, Java
Backend: Spring Boot, REST APIs, Flask
AI/ML: TensorFlow, Keras, OpenCV, NumPy, Matplotlib
Testing: Selenium, Postman
Blockchain: Smart Contracts, SHA-512, AES Encryption
DevOps: Jenkins, Git, CI/CD
Core Concepts: Machine Learning, Deep Learning, Computer Vision

Certifications

- **AWS Certified Cloud Practitioner** - AWS
- **Artificial Intelligence Powered by Google Developers** - SMART INTERNZ
- **Web Developer Intern** - AR Brands
- **Full Stack Web Developer (MERN)** - PREGRAD
